FULL-STACK WEB DEVELOPER

Qualifications

- ❑ Capability to formulate plans regarding process for development.
- ❑ Solid foundational knowledge of designing and developing full-stack web applications using .NET framework.
- ❑ Ability to work under pressure, stay organized, and provide excellent customer service in a fast-paced environment.
- ❑ Able to communicate professionally via Email with clients

Technical Skills

Front End: HTML5, JavaScript, jQuery, CSS3, Responsive/Mobile Web Development, Beginner Angular 9

Middle Tier: C#.NET, ASP.NET, LINQ, MVC, Entity Framework

Back End: ADO.NET, SQL, SQL Server, SSMSE

Independent Development Projects

- ❑ **U Store:** Created a secure application for managing product data. Application is built to simulate an online store front with a shopping cart. Administrators can manage product, category and vendor data.
- ❑ **SAT:** SAT is a scheduling admin tool that allows an admin to create, edit, and delete students, classes, and enrollments.
- ❑ **Final Project:** Created a secure data driven ASP.NET MVC job board from design through deployment that allows a company to internally hire employees to new positions. Administrators can manage positions, location data and all details relating to assigned hardware and software.
